

# *Simple Elegance*

**Satin Ash Contemporary Grade**

## Tongue & Groove Timber Flooring

The original, and some would say, the best timber flooring. Even though Solid Tongue & Groove Hardwood Timber Flooring has been used since the 19<sup>th</sup> Century as a structural flooring material, its unique and varied appearance ensures its looks are timeless and will always have a place in both modern and traditional interior design.

## Overlay Timber Flooring

A modern twist on the classic Tongue & Groove. Timber Flooring Overlay is REAL wood, in fact it is essentially traditional Tongue and Groove Timber Flooring, only thinner (12mm instead of 19mm). Because it is packed in lengths of 2.4 meters in carry-in bundles of 10 boards it means it's perfect for apartment and high rise living where it is difficult to deliver material via a lift. This product is ideal anywhere a sub-floor is already present and you still want solid timber floors.

## Parquetry Timber Flooring

A centuries-old technique, Parquetry Timber Flooring has been used to create stunning and hard wearing patterned floors everywhere from churches and important buildings to sports arenas, homes and hotel lobbies. These are essentially timber tiles and the patterns available are endless.

## Decking

Bring the outdoors in ... with a Timber Flooring deck. Decking is a fantastic way to enhance the aesthetic appeal of any home, garden or building. Its functional beauty is in harmony with its environment and its versatility lends itself to a huge variety of forms and styles.

## Prefinished Floating Timber Flooring

Floating Timber Floors are very strong, pre-coated natural timber of approximately 4mm of solid timber glued to its own sub-floor of usually laminated ply-boards. This product can be laid over virtually any base, provided its flat and structurally sound. Because they are pre-finished they are extremely stable with a hard wearing surface, and they come in a range of species giving attractive colours and can be laid by the average handy person.

## Wide Board Timber Flooring

Ideal for creating a palatial look and feel to any large room whether it be a residential or commercial application. It comes in a structural T&G format and is available in some of the most beautiful and durable Australian hardwoods.

## Innovative uses of Blackbutt Decking

## Grading

**Grades are an Australian Standard that define the look of the timber to ensure that when you buy a certain grade it relates to those standards and the product is sorted within those grades. The Standard mainly relates to the amount of natural feature that appears in the Australian Hardwood caused by gum veins, growth defects, fauna infestation and the like. Generally described as Low Feature, Medium Feature and High Feature, these grades are sometimes marketed differently.**

### Low Feature

**As the name suggests is the less featured and also known as Select, Classic or Contemporary grade.**

### Medium Feature

**Has some feature and also known as Standard or Colonial grade, Australiana grade is medium to high feature.**

### High Feature

**Has more feature than medium feature and is also known as Feature, Rustic or Character grade.**
